Frontend Developer

_____

Professional Summary

Passionate and results-oriented Frontend Developer with robust experience building high-performance web applications using **React**, **TypeScript**, and **Tailwind CSS**. Expert in seamless **REST API integration**, dynamic component design, and responsive layouts. Adept at transforming design prototypes into production-ready applications, ensuring clean code and accessibility best practices. Proven ability to work in fast-paced team environments and deliver projects that enhance user engagement and overall performance.

Projects & Work Experiences

Frontend Developer Intern

Bowen University Ogbomosho *April – September* **2025**

React | Tailwind CSS | JavaScript | Git | REST APIs

- Built responsive, interactive UI components for the hospital, improving usability & consistency across browsers.

- Converted Figma design prototypes into production-ready interfaces, ensuring pixel-perfect and cross-browser compatibility.

- Implemented state management and dynamic rendering with React hooks and reusable components, streamlining feature development.

- Integrated REST APIs to deliver live, data-driven experiences that increased application interactivity.

- Contributed to code reviews, sprint planning, and daily stand-ups, aligning with Agile workflows and improving delivery speed.

Frontend Developer (Contract)

EduSys   *August 2025 – November 2025*
React | TypeScript || REST APIs | WebSocket | Jest

- Served as the sole frontend developer for an enterprise level web Application, taking full ownership of the UI from architecture to deployment.

- Developed and optimized core user flows (menu browsing, performance management, course creation, finance tracking, and others) using React and Tailwind CSS.

- Integrated real-time features such as live updates using REST APIs and WebSockets, ensuring a seamless experience for thousands of concurrent users.

- Implemented unit and end-to-end testing (Jest), raising code quality and reducing production bugs.

- Improved performance by +35% through lazy loading, code splitting, and bundle size optimization.

- Partnered with designers to deliver pixel-perfect, responsive UIs directly from Figma, improving design-to-code delivery speed.

- Established clean Git workflows and reusable component architecture, laying the groundwork for scalability and team handoff.

Frontend Developer (Contract)

React | Tailwind CSS | Typescript | Rest APIs | Jest

- Worked together with developers to build a health-tech platform enabling personalized recommendations and virtual consultations, from design handoff to production release.

- Architected and developed scalable, reusable UI components in React.js and Tailwind CSS, establishing a component library that accelerated feature delivery across the team.

- Designed and integrated robust API interaction

layers, ensuring seamless data flow between backend services and personalized dashboards.

- Introduced unit and end-to-end testing with Jest, raising test coverage to 70% and significantly reducing post-release bugs.

- Optimized application performance with lazy loading, dynamic imports, and code splitting, cutting initial load time by 30%.

- Collaborated with product managers and designers to refine user journeys and ensure a responsive, accessible experience across devices.

- Actively contributed to sprint planning, code reviews, and mentoring interns, fostering a culture of clean code and knowledge sharing.

- Figma (Design to Code Conversion), VS Code

Other Skills

- Responsive & Mobile-First Design

- Component-Based Architecture & Scalable Folder Structures

- REST API Integration

- Accessibility & Cross-Browser Compatibility

- Performance Optimization (lazy loading, code splitting, caching)

- Clean Code Practices & Code Reviews

- Leadership & Mentorship (feature ownership, guiding juniors)

SKILLS

Languages, Frameworks & Libraries

- HTML5, CSS3, JavaScript (ES6+), TypeScript

- React (App Router), React Query, Redux Toolkit, Context API

- Tailwind CSS, Bootstrap CSS, ShadCN UI, Framer Motion

- Jest, React Testing Library (Testing)

- Storybook (Component-Driven Development)

Tools & Platforms

- Git & GitHub (Version Control)

- Vercel, Netlify, Firebase Hosting (Deployment)

- GitHub Actions

- Postman (API Testing)
